SCHOOLS RR1 +\$1,200,000 GF EX See Note Page 1 of 2

Creates and provides for the Southeast Baton Rouge Community School Board and school system in East Baton Rouge Parish. (See Act)

The proposed legislation creates the Southeast Baton Rouge Community School Board and school system in East Baton Rouge (EBR) Parish. The legislation provides for an interim school board to serve without compensation. The proposed legislation will take effect and become operative if the proposed constitutional amendment, SB 299, is adopted at the statewide election to be held on November 6, 2012 and becomes effective or the proposed constitutional amendment, SB 305 is adopted at the statewide election to be held on November 6, 2012. The Southeast Baton Rouge Community School Board will begin providing for the education of students on July 1, 2013.

EXPENDITURE EXPLANATION

State general fund expenditures are estimated to increase by \$1.2 million in FY 13-14 and local expenditures may increase over \$300,000 for startup costs in FY 12-13 if the Southeast Baton Rouge Community School System is created. The FY 11 -12 MFP was used to run a simulation including the Southeast Baton Rouge Community School System projected student count and associated local revenues which resulted in a net increase of \$1.2 million when compared to the change in the East Baton Rouge Parish System. The East Baton Rouge Parish School System’s state MFP allocation is estimated to decrease by \$17.6 million and the newly created Southeast Baton Rouge Community School District’s estimated state allocation is \$18.8 million.

The state and local impact is discussed in more detail below:

Local Impact

According to enrollment figures in the East Baton Rouge Parish School System, the estimated size of the Southeast Baton Rouge Community School System is approximately 6,800 students and includes 10 schools. The Central Community School System was created by Act 202 of the 2006 Regular Legislative Session. The Central School System incurred costs of approximately \$300,000 during their organizational period in 2007. The Southeast School System could have similar or slightly higher startup costs in FY 12-13 because the Southeast School System would be a larger system than Central. The interim school board members will serve without compensation. According to local revenue information for the Southeast School System, the new system will have approximately \$46 million in local funds available to operate the school system. The local revenue associated with the new school system will be transferred as well as any federal funding associated with the schools and students; this is not new funding. The amount of federal dollars that will be transferred has not yet been determined. Approximately \$18.8 million state general fund dollars will be available from the state through the MFP. The Southeast Baton Rouge School System would be able to expend all of these revenues on the education of their students. This fiscal note assumes that local resources will be obtained and used for expenditures for the start up costs for Southeast Baton Rouge.

continued on page 2

REVENUE EXPLANATION

The current revenues generated by this community will not be considered new revenues because it is essentially transferred from one system to another system. The corresponding constitutional amendment (SB 299) would allow the school system to raise local revenues, thus there may be an increase in local revenues in FY 13-14 and future fiscal years.

**CONTINUED EXPLANATION from page one:** Page 2 of 2  
Expenditure Explanation continued:

The East Baton Rouge Parish School System will be required to transfer the land, buildings and facilities, instructional materials, equipment and required number of buses to the Southeast School System. The state funding available to East Baton Rouge Parish School System through the MFP will be approximately \$148 million. Approximately \$46 million from local revenue will be transferred to the Southeast School System. While East Baton Rouge Parish School System will have fewer children to educate and fewer state and local resources available if the legislation is implemented, according to the MFP simulation, East Baton Rouge will have \$245 more per pupil from the state allocation of the MFP. If the Southeast Baton Rouge Community School System is challenged in the judicial system by the East Baton Rouge Parish School System, the expenditures of the local systems may increase.

As a result of changes in the local revenues of East Baton Rouge Parish School System and the new Southeast School System recognized in the MFP formula, other school systems could realize between 0% up to a 0.027% reduction in their MFP allocation.

**State Impact**

The MFP simulation prepared using the Southeast Baton Rouge School System projected student count resulted in a net increase in the MFP of approximately \$1.2 million. This increase will occur when the system becomes operational. The effects on future fiscal years cannot be determined at this time. The effect on the MFP is an estimate using the latest data available, however, the actual impact may be different depending on the MFP resolution in effect when the new system begins. The potential increase in cost to the MFP is a result of separating the students and local revenue attributable to Southeast Baton Rouge and East Baton Rouge. The MFP formula now recognizes East Baton Rouge Parish to be less wealthy when taking into account the demographics of the students remaining and available revenue remaining, thus causing the state’s share of the cost to increase. East Baton Rouge Parish is left with a higher state per pupil allocation.
